MUADH ALI ABDULLAH

Mangaluru, Karnataka | +91 7760918125 | amuadhali@gmail.com | linkedin.com

PROFILE

Computer Science Engineering graduate with hands-on experience in SQL, Python, MS Excel, and Power BI, gained through a structured data analytics internship focused on data cleaning, validation, and quality checks. Background in full-stack web development (MERN stack, JavaScript) building and integrating REST APIs. Comfortable working across data analysis, documentation, and troubleshooting tasks, with strong problem-solving skills and adaptability to new tools and technologies. Seeking to bring this analytical and technical foundation to an entry-level Engineering Analyst role supporting technical implementation and data quality.

SKILLS

- **Data Analysis & Quality**: SQL, Python, MS Excel, Power BI, Data Cleaning, Data Validation, Data Quality Checks
- **Programming & Scripting**: JavaScript, React, HTML, CSS, Node.js
- **Databases & Integration**: MongoDB, Rest APIs, ETL/Data Pipeline Basics
- **Tools**: Git, GitHub

EXPERIENCE

Data Analyst Intern | *TAP Academy* 06/2026 – Present

- Undergoing structured, hands-on training in SQL, Python, Excel, and Power BI as part of a data analyst internship program.
- Completing guided assignments and case studies covering data cleaning, validation, quality checks, and querying of real-world datasets.
- Applying structured, detail-oriented problem-solving to practical datasets under mentorship, translating requirements into working queries and dashboards.

MERN Full Stack Intern | *Dhee Coding Lab* 01/2025 – 06/2025

- Completed a 6-month structured internship learning the MERN stack (MongoDB, Express, React, Node.js).
- Built web pages and UI components using HTML, CSS, JavaScript, and React; learning-focused internship without an assigned company project.

PROJECTS

CodeVault — Code Marketplace Platform — *Team project, 4 members, Nov 2025*

- Built using React for the frontend and Node.js, Express, and MongoDB for the backend; integrated the OpenAI API to power a code-modification feature.
- Owned the user interface for the marketplace (browsing, buying, and selling screens); collaborated with a 4-person team through implementation and testing.
- Won 3rd prize in an inter-class project competition.

DevBoard — Sprint and Task Management Tool — *Individual project, 2025*

- Built using React for the frontend and MongoDB for data storage, including task boards, task filtering, and state management logic.
- Designed as a lightweight, Jira-style tool for organizing and tracking sprint tasks.
- Built the project end-to-end from scratch, following a structured, self-paced project plan.

Retail Sales Analytics Dashboard — *Individual project, 2026*

- Cleaned, validated, and analyzed 15,000+ retail transactions using SQL to identify data quality issues and trends across products and regions.
- Built an interactive Power BI dashboard tracking revenue, regional sales, and top-performing products for business reporting.
- Translated analyzed data into clear reporting outputs to support business-focused insights

EDUCATION

Bachelor of Engineering in Computer Science | 2022 – 2026 | CGPA: 6.75
St Joseph Engineering College, Mangaluru, Karnataka

Prestige PU College | 2020 – 2022

Prestige International School | 2019 – 2020
